Pass the Initial CSV files to **1.EDA_and_Pre-Processing.ipynb**, Which return the processed CSV files. Use these processed files again in **7.Ensemble.ipynb** file to Get the final predictions. All you have to do is change the **_DATA DIR_** Variable to the data directory in both the notebooks with appropriate paths.

RAW CSV ====> 1.EDA_and_Pre-Processing.ipynb ====> Processed data ====> 7.Ensemble.ipynb ====> Final Predictions.
